📍 Damascus, Damascus

📅 22/05/2000

SUMMARY

Full-stack Developer with over 5 years of experience in designing, implementing, and optimizing server-side logic. Known for expertise in PHP and Python and proficiency in NoSQL databases and Angular, Vue.js. Proven track record of ensuring robust security and staying up to date with industry practices, resulting in high-performance applications.

EXPERIENCE

System developer & Quality assurance

08/2023 - Present

VIP & Faster & Zin rent a car companies ↗

- Developed and maintained scalable software solutions for multiple rental car platforms, enhancing operational efficiency and customer experience.
- Built and optimized reservation & rental management systems using Python, PHP, MySQL, and Odoo ERP, ensuring high performance, reliability, and seamless data flow across departments.
- Implemented Odoo-based process optimizations for fleet management, accounting, and CRM — streamlining workflows, improving data accuracy, and reducing manual effort by 30%.
- Collaborated with cross-functional teams to integrate third-party APIs, automate workflows, and streamline customer service processes within both custom systems and Odoo modules.
- Applied QA practices and conducted rigorous testing using bug-tracking tools (e.g., Jira, Trello) to identify and resolve system issues, significantly reducing downtime.

Senior Full Stack Developer

01/2020 - Present

Freelance

- **Online Cosmetics Store** (Laravel | Full Stack) · laurusaroma.com
Developed a secure e-commerce platform for cosmetics with Laravel (MVC), Stripe payments, and features like product listings, cart management, and user authentication. Optimized performance via Eloquent ORM and Git version control.
- **Medica Syria** (Laravel | Full Stack) · www.medica.sy
Built a medical services portal with secure payments, admin dashboard, and advanced search. Focused on UI/UX, authentication, and deployment.
- **Turbo Code** · turbocode.io
Built the platform for a software engineering studio delivering custom applications, resilient systems, and cloud platforms.
- **Coursy** · coursy.sy
Built a bilingual (Arabic/English) platform for discovering and enrolling in courses from verified institutes across Syria.

Key Contributions Across Projects:

- Full-stack development with Laravel, Bootstrap, Angular, Vue.js.
- Secure payment gateways (Stripe) and user authentication.
- Git-based collaboration, testing, and live deployment.

EDUCATION

Master of Web Science

03/2026 - 03/2028

Syrian Virtual University - Master

Artificial intelligence

01/2019 - 07/2025

Syrian Virtual University - Bachelor of Information technology engineering

Statistics

01/2018 - Present

Damascus university - Bachelor of mathematical statistics
